"Reaching the world through Small Voices"

Ke'adrian Bailey
3rd grade
O.J. Semmes Elementary

Black holes are not really holes at all. They are the opposite of empty! Black holes have the most matter stuffed into the least space of any objects in the universe. Because they are so compact, they have very strong gravity. Here on earth, gravity is what makes things fall down, rather than just

float away, when you let them go.

I would like to know what it feels like. Would you get stuck in one? Where would you go?

**FUN FACT**

Did you know that time does not exist inside a black hole?

Raven Williams
4th grade

Jaguar's colors are a pale gold. Soft coat you should feel it. Also, did you know they were 1 to 3 feet? I overheard they carry their cubs or babies in their mouth. Did you know they live in South America? It is warm there. They also can live in India or swampy places by rivers and lakes. Did

you know they were born in the zoo or in caves? I felt their coat before and it felt like a smooth rough place. They eat deer, birds, fish, cattle, horses, and many more.

**TRIVIA**

- Where do jaguars live?
- How long are jaguars?

ANSWER: 1. SOUTH AMERICA 2. 1 to 3 feet

MATH CORNER

Tyler is counting trucks. He counted four blue trucks. He counted seven red trucks. He counted three brown trucks. How many trucks did he count in all?

ANSWER: fourteen trucks
