O.J. Semmes Elementary

The 1861 discovery of Archaeopteryx first some dinosaurs ate meat. That was called the T-rex. Some scientist thought the dinosaur was the tisarotopes so when the comet first hit the dinosaurs begin to die out into bones. Now scientist finds the bones and put them in museums so every body can see them.

Dinosaurs ate leaves and some ate meat and plants. They began to die 200,000,000,000 years ago, and now they are distinct.

QUIZ

1. Where do scientists put dinosaur bones?

A. Museums

B. Beaches

C. Playgrounds

ANSWER: A

However, a form of entertainment I enjoy is fishing. We usually go fishing on Saturday or Sunday. We fish at the docks in downtown Pensacola, while we are there he teaches me and my little brother how to hook the bait. We catch all kinds of fish like, yellow tailed mullets, and we caught some crabs too.

He is a great inspiration to me. He also tells me about his life experiences, and that is why spending time with family is a great source of entertainment.

DEFINITION

entertainment |,entər'tānmənt|

noun

the action of providing or being provided with amusement or enjoyment

RIDDLE

I am a window, I am a lamp, I am clouded, I am shining, and I am coloured; set in white, I fill with water and overflow. I say much, but I have no words. What am I?

ANSWER: An eye.
