

towels, then other students started to squirt their apple juice on the carpet and I had to clean it all up. Now, I get an orange, but I don't squirt it. But, I still loved every snack they gave me. Moreover, I like pre-k because they give out snacks and we make new friends. I like pre-school because you get to make new friends. I had a friend whose name was Page. She had really pretty brown hair, green eyes, and she wore a cool outfit. Her outfit was a green top and yellow beach pants with some purple hills. She was very different from the others. She was a really close friend I could count on. She told me that she had a sister whose name is Linda a cousin named Lucy and if I wanted to meet them I could. We made so many friends in pre-k. Last but not least, we have sleep time. I love to sleep. We could sleep in pre-k and no one could say no. We could play or watch TV if we were not sleepy, but nobody liked the TV so they went to sleep or played. I like to play, eat, and sleep. It was so irritating to sleep then wake up. We would be grouchy if we did not go to sleep. But, pre-k was fun. I hope my story has painted a clear picture and it helped you understand pre-k better. I like to eat treats. I like to make friends. I also like to have sleep time.

As kids most of us don't like to eat our fruits, but our parents and grownups always tell us to, "because it's healthy, it's good for you" they said. Eating healthy is an important part of life. Most people say when you eat healthy you live longer and I have to say I agree. I also don't like to eat fruits, but when I am told to eat my fruit I usually add sugar or chocolate to the fruit. That way I am eating healthy and enjoying a healthy sweet desert or snack. You might think when you eat candy and sweets you get a lot more energy, but it might not be such a good idea because it is not healthy at all for your body. Fruits are one of natures many wonders. I consider tomatoes a fruit because I made it into a summer dessert and I want to share the recipe with you. First, you wash the tomato, and then cut it into small pieces. Next, place the cut tomato pieces into a cup and add sugar and ice. Stir it up and you have a nice dessert great for those hot summer days. When you eat a candy bar you might feel like you're in heaven and you might think that fruit is not tasty at all, but the truth is when you eat fruit your body has more power than a candy bar would give you. Too much junk food will shorten your life and can give you a sickness. Fruits on the other hand will give you strength and power it can be a miracle if you look at it from my point of view. I think of it more than eating healthy, but a lifestyle to help you improve your health. Like they said, "an apple a day keeps the doctor away." An apple can give you the strength to keep going for a whole day more than a candy bar ever would.

READING QUIZ

1. Fruits will give you strength and
A. power. B. giggles. C. junk.

I am going to tell you about my favorite sports which are basketball and football. I am going to tell you about basketball first because it is my favorite sport. I like basketball because you get to wear any type of sneakers and if the other team steps on your feet it will not hurt because they don't have spikes on the bottom of their shoes. I also like basketball because the plays are simple and not hard. I like football because I like contact, I like to run the ball, and I like to go out for passes. I am a good running back and corner back. As a corner back, I always cover routes that are hard and complicated for other people to keep up with. The people that are on my team always block for me and I block for them. One day I want to become a professional in both sports.
